ZONING IN ON MINERALIZATION AT ATSUTLA GOLD PROPERTY

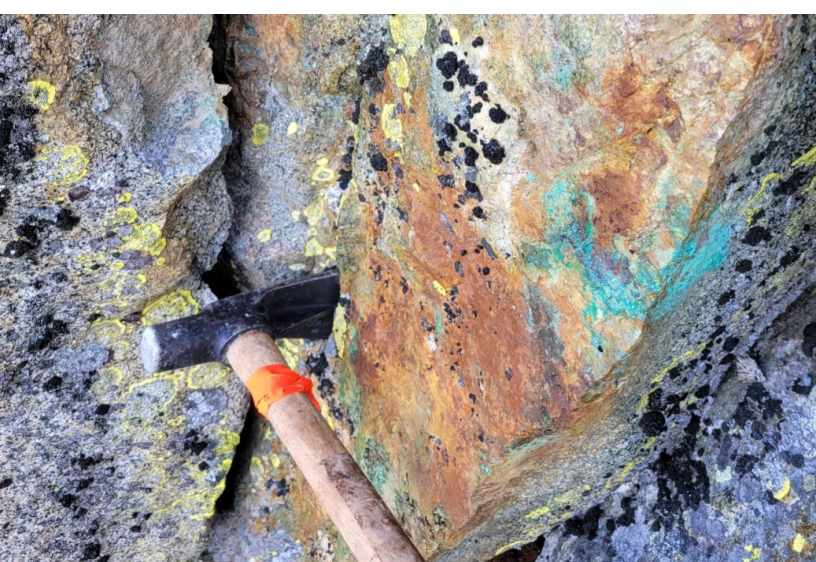

1. VUGGY, OXIDIZED QUARTZ VEIN FLOAT

2. GRANITE WITH MALACHITE STAINS ON A QUARTZ-FELDSPAR VEIN

3. GRANITIC OUTCROP WITH MALACHITE STAINING ON QUARTZ FRACTURES

4. HEAVILY OXIDIZED QUARTZ VEIN IN GRANITIC OUTCROP

5. QUARTZ VEIN FLOAT WITH MALACHITE STAIN ON OXIDIZED SULPHIDES

6. TALUS WITH HEAVY SULPHIDE OXIDATION

7. AERIALLY EXTENSIVE GOSSAN SHOWING PERVASIVE OXIDATION

SUMMER EXPLORATION PROGRAM UNDERWAY

ATSUTLA GOLD PROJECT

A new, district-scale, high-grade gold discovery situated in a highly-prospective geological setting. An influx of soil and rock geochemistry coming in daily from the 2021 Summer Exploration Program.
